

Admin Review Logs Use Case

(adapted by Pressman and Maxim, *Software Engineering: A Practitioner's Approach*, pp. 151-152, from Cockburn, A., *Writing Effective Use-Cases*, Addison-Wesley, 2001)

Use Case:	Admin Review Logs
Primary Actor:	System Administrator
Goal in Context:	To review student Activity Logs
Preconditions:	System Administrator must have working credentials to access admin panel, System administrator must have access to the portal via a web browser and finally database must have activity logs from each student.
Trigger:	Admins need to monitor student activity or calculate the effectiveness of the program.
Scenario:	<ol style="list-style-type: none">1. The administrator opens the portal via a web browser.2. The administrator logs in using their credentials.3. The system displays all major function buttons in the home page including a side panel.4. The administrator selects and clicks on "Review Work Logs"5. The system then displays a list of activities in a list style format with a graph of activity levels below said list.6. The administrator selects one of the multiple sort options to view activity logs based on their preference.7. The administrator clicks on the "filter" button to view individual student logs.8. The system displays a pop up with multiple filter categories, for ex: NuID, name.9. The administrator enters student name.10. The system display's student work logs
Exceptions:	<ol style="list-style-type: none">1. Login fails because email and/or password is incorrect, see use case <i>Logging in</i>2. No Logs to display
Priority:	High priority
When available:	First release
Channel to actor:	Web Browser (Desktop or Mobile)
Secondary Actor:	Student Peer Leader(s)
Channels to Secondary Actors:	Web Browser (Desktop or Mobile)
