

Student Check-In Use Case

(adapted by Pressman and Maxim, *Software Engineering: A Practitioner's Approach*, pp. 151-152, from Cockburn, A., *Writing Effective Use-Cases*, Addison-Wesley, 2001)

Use Case:	Admin View Users
Primary Actor:	System Administrator (Sysadmin)
Goal in Context:	To view user(s) in the database
Preconditions:	System administrator must have working login credentials to access the admin console; must be able to navigate to console via web browser; database must have existing users
Trigger:	User information needs to be viewed
Scenario:	<ol style="list-style-type: none">1. Sysadmin opens the admin console via web browser.2. Sysadmin logs in to the admin console using their credentials.3. Sysadmin greeted with a home page, and a side panel on the left to navigate/view other areas of the admin console.4. Sysadmin navigates to option named "Users" on side panel.5. Sysadmin clicks "Users" and the console view shifts to display a list of current users on the system.
Exceptions:	<ol style="list-style-type: none">1. Login fails because email and/or password is incorrect, see use case <i>Logging in</i>2. No users to view
Priority:	High priority
When available:	First release
Channel to actor:	Web Browser (Desktop or Mobile)
Secondary Actor:	Student Peer Leader(s)
Channels to Secondary Actors:	Web Browser (Desktop or Mobile)
