Admin Add Account Use Case

(adapted by Pressman and Maxim, Software Engineering: A Practitioner's Approach, pp. 151-152, from Cockburn, A., Writing Effective Use-Cases, Addison-Wesley, 2001)

Use Case:	Admin Add Users
Primary Actor:	System Administrator
Goal in Context:	To add user(s) to the database
Preconditions:	System administrator must have working login credentials to access the admin console; must be able to navigate to admin console via web browser; database must be set up
Trigger:	Users need to be added at the start of a semester.
Scenario:	1. The administrator opens the portal via a web browser. 2. The administrator logs in using their credentials. 3. The system displays all major function buttons in the home page including a side panel. 4. The administrator navigates to option named "Users" on side panel. 5. The administrators clicks on "Users" and the system displays a list of current users on the system. 6. The administrator navigates to the right hand side of the page and finds "Add users" button 7. The administrator clicks on "Add users" 8. The system displays a pop up with two choices – Textboxes for First name, Last name, NuID and Husky Email – "Upload Document" 9. The administrator enters student name NuID and Husky Email and clicks "add" 10. System display's list with new user.
Exceptions:	1. Login fails because email and/or password is incorrect, see use case *Logging in* 2. No users to view
Priority:	High priority
When available:	First release
Channel to actor:	Web Browser (Desktop or Mobile)
Secondary Actor:	Student Peer Leader(s)
Channels to Secondary Actors:	Web Browser (Desktop or Mobile)
